

**Cardiologic examination : 25.10.2018**

**Šebestová Helena: dog, italian greyhound, Quirinus , male, born  
22.8.2015,**

**RFID: 968000010482427**

**Auscultation:** no murmur noted, S1 S2 clear; femoral p. of normal quality,

**ECG :** sinus rhythm, 126bpm

**ECHO:**

LVIDd 26,1mm  
LVIDs 18,4mm  
LVPWd 6,7mm  
LVPWs 10,2mm  
IVSd 6,8mm  
IVSs 9,5mm  
EF: 59,4%  
FS: 29,5%  
Ao 13,7mm  
LA 20,1mm  
LA/Ao = 1.46  
EPSS 2,4mm

Right ventricle and atrium - subj. normal size,  
No changes of pericardium.

**Pulm. artery:** fully competent, no structural abnormality noted, laminar flow,, pV= 97cm/s, 3,7mmHg,

**Aorta:** no structural abnormality noted, laminar flow,  
AV = 163cm/s, 10,6mmHg, trivial insufficiency

**Mitral valve :** no structural abnormality noted, no regurgitation noted  
Ewave: 63cm/s, A wave 35cm/s, E/A = 1,9

**Tricuspid valve:** no structural abnormality noted, fully competent,

**Results:**

**Normal heart structure and function.**
